

Smooth!

Of course you don't iron your own shirts - who does? But if you want your maid to get the best results on your silk shirts, maybe you should consider upgrading your iron. The Rowenta Advancer packs in all sorts of gimmicky gadgets and platinum coated hot surfaces to hopefully get rid of those late night wine bar induced creases - it worked for us anyway. It looks pretty funky too, but you may not want to get the pink one. **£60 from www.rowenta.co.uk**
